

Riggs Distler

A Centuri Company

ENERGY & UTILITY SOLUTIONS BACKED BY OVER A CENTURY OF SERVICE

Established in 1909, we've grown over the past century into one of the largest union utility, mechanical, and electrical contractors in the United States. With talented leadership and mentoring at all levels, Riggs Distler promotes a safe, exciting, and challenging work environment. Our philosophy is to empower employees to grow and evolve with our business—all with union support.

WHAT WE CAN DO FOR YOU

Riggs Distler employs the industry's best project managers and union craft personnel to deliver lasting solutions, no matter how complex the project. For over a century, we've partnered with heavy industrial and generation industries to develop the infrastructure that powers the Eastern United States.

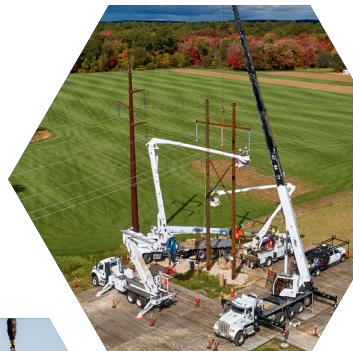

Committed to safety, planning, and efficiency, we act as a turnkey partner so you can focus on what matters—*your business*.

RESULTS

Delivering on Time and on Budget

We've been operating as a team under one hat for decades and have project examples to prove it.

Project Highlight

FROM GENERATION TO THE METER

Riggs Distler is the Turnkey Construction Contractor for Today with a Focus on the Future of Energy

Leveraging a century of experience, Riggs Distler seamlessly integrates infrastructure projects, increasing the efficiency and safety of each to get the job done right, on time, and on budget.

In Rhode Island, Riggs Distler is currently working on three interconnected projects, showcasing our versatile capabilities. Nearing final stages, we are constructing advanced foundation components for the Revolution Wind Farm, slated for deployment off the coasts of Rhode Island and Connecticut in 2025. As the primary construction contractor for Ørsted and Eversource's Tier 1 Revolution Wind Project, Riggs Distler holds the distinction of being the first to undertake the construction of offshore wind advanced foundation components of this magnitude in the United States.

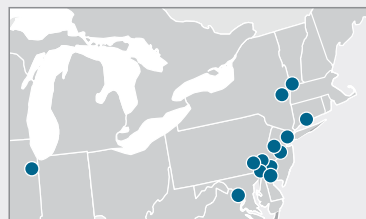

In addition to providing construction solutions for Revolution Wind, concurrently, we are involved in the reconstruction of a 13.5-mile 115 kV energized line, and we have also secured contracts for upgrading two substations

to support the anticipated impact of wind energy coming onshore. These interconnected projects reflect our comprehensive approach to infrastructure development, ensuring the construction of reliable infrastructure to support the future of energy in the US.

A Centuri Company

Riggs Distler is a part of Centuri, a strategic infrastructure services company that partners with regulated utilities to help build and maintain the energy network that powers millions of homes and businesses across the United States and Canada.
